

Takashi Obinata  
Executive Officer  
Corporate General Manager,  
Production & Procurement Group

As efforts toward decarbonization spread internationally, it has become more and more important for businesses to address environmental challenges.

In light of the global movement toward carbon neutrality and the Japanese government's decarbonization goals, our "Environmental Vision 2050" and "Fiscal 2030 Target" established in 2019 were revised in 2021.

Beyond the goal of achieving a decarbonized society, there are increasingly active social movements aimed at achieving a recycling-oriented society and a society in harmony with nature, and we are considering new targets that reflect these goals.

For the 4th consecutive year, the CDP certified Fuji Electric as an "A List Company" with excellent climate change initiatives and information disclosure. We will continue to work to solve social and environmental issues through our decarbonization initiatives, taking advantage of the technologies we have cultivated to date in the energy and environment fields.
