## EUJI

## New Products

New $\alpha$-TWIN series MCCBs and ELCBs, extended up to 800AF ..... 2
AS-Interface analog slaves, FM6A ..... 6
AS-Interface waterproof connector type A/B slaves, FM6DB1 ..... 8
AS-Interface dustproof connector type A/B slaves, FM4DB, FM4DB1 ..... 10
AS-Interface 7-segment display FM4DP2 ..... 12
AS-Interface addressing unit FL1HA-E ..... 14
Arresters for signal line and control circuit, CN226 series ..... 16
Arresters for network circuits, CN227 series ..... 18
Modified Products
Command switches/CCC approved AH, AR/DR, AM/DM series ..... 20

## New Products

## New $\alpha$-TWIN series MCCBs and ELCBs, extended up to 800AF

## Type number comparison between new $\alpha$-TWIN series and the existing series breakers according to the interrupting capacity

## Molded case circuit breakers

IEC and CE marking conformed

- Line protection

## Flat and compact slaves with AS-i specification Ver. 2.1

## Features

The FM6A is an analog slave that complies with the
AS-Interface specification: Ver. 2.1 (Slave profile: S7.3).

- The FM6A is a flat and compact slave which is provided with 2 channels, similar to FM6D1.
- FUJI AS-i analog slaves are the world's smallest slaves.
- Mounting plates are available in two types: IEC rail/screw dual mounting and exclusive screw mounting.
- The actual slave can be easily fixed to the mounting plate using one screw.
- Actuators and sensors can be easily connected by single-action M12 connectors (IEC 60947-5-2).

## Further

Information
See page 05/40 of D \& C catalog 19th Edition.

## The number of connectable slaves has increased from 31 to 62.

## Features

The number of connectable slaves has increased from 31 to 62, as the FM6DB1 slaves conform to AS-i specifications Ver2.1.

- The size and structure of FM6DB1 are same as our conventional model FM6D1.
- Four points are provided with the input slaves and three points are provided with the output slaves.
- AS-i specification: V2. 1

Notes: * If a sensor with power consumption of more than 200 mA is connected to the sensor power supply of the slave, the overload and short-circuit protective function will operate and the sensor power supply will be stopped even when 0.5 ms has passed after the inrush current is generated. If a connected sensor has a high inrush current, make sure that current consumption with a lapse of 0.5 ms after the inrush current is 200 mA or less.

[^2]
## A multi-purpose slave with a 2-digit, 7-segment display and illuminated pushbutton switch

## Features

- An excellent user interface achieved with a dedicated FB (function block) combining FUJI's PLC, MICREX-SX.
- Ideal for small- and medium-scale digital picking systems.
- A 2-core type made possible with AS-interface communications, featuring two 7 -segment displays and a brightly illuminated pushbutton switch.
- Layout changes can be made using the AS-i's flexible wiring method without requiring manufacturer-authorized engineers, thus contributing to a considerable reduction in total costs during the customer's product life cycle.
- Like other slaves, advanced piercing technology is used for AS-i cable connection, allowing the cable to be crimped and connected with ease.
- Conforms to AS-i specifications V2.04

## System configuration example

## Incorporates versatile new functions compatible with version 2.1

## Features

- In addition to conventional address setting functions, this unit makes it possible to read the addresses of slaves on the AS-i line and the I/O data of the slaves.
- Address settings can be made for standard slaves and A/B slaves.
- Address settings can be made for slaves provided with an addressing jack (e.g., FM6D $\square 1$, FM4D $\square$, FM2D1, and FM1D slaves) over an address setting conversion cable.

Ratings and specifications

| Type | FL1HA-E |

## Error display

| Code | Description | Configuration 1 | Configuration2 |
| :--- | :--- | :--- | :--- |
| F1 | Overloading or short-circuiting of <br> the communications power supply <br> provided from the unit. | $\bigcirc$ | - |
| F2 | The slave is disconnected, the <br> slave is not connected properly, or a <br> failure occurred in reading the slave. | $\bigcirc$ | - |
| F3 | An error occurred in writing the <br> address or ID code 1. | $\bigcirc$ | - |
| F4 | An error occurred in an address <br> setting. (An attempt was made to <br> write a duplicated address.) | $\bigcirc$ | - |
|  | An error occurred in an address <br> setting. (The same address is <br> already used.) | - | $\bigcirc$ |
| F5 | An error occurred in a settings <br> change. (A slave with address 0 is <br> connected.) | - | $\bigcirc$ |
| F6 | An error occurred in a standard <br> slave setting. (An attempt was made <br> to write an A/B slave address, e.g., <br> 01A or 01B, to a standard slave.) | $\bigcirc$ | $\bigcirc$ |
| F7 | An error occurred in an A/B slave <br> setting. (An attempt was made to <br> write a standard slave address, e.g., <br> 01 or 02, to an A/B slave.) | $\bigcirc$ | $\bigcirc$ |
| F8 | The response signal from the slave <br> was not received correctly. | $\bigcirc$ | $\bigcirc$ |
| $\square$ | The secondary battery needs <br> charging. | $\bigcirc$ | $\bigcirc$ |
|  |  | $\bigcirc$ |  |

## Other functions

Press the ADR key to turn on the power first. Then press the MODE key to select the following functions. Use the PARA and DATA functions only in functional tests for slaves.

| Name | Function |
| :--- | :--- |
| ID | Reads the ID code. |
| ID1 | Reads and writes ID code 1 (for version 2.1 compatible <br> models only). |
|  | Set the value with the UP or DOWN keys and press the PRG <br> key to overwrite the ID code. |
| ID2 | Reads ID code 2 (for version 2.1 compatible models only). |
| PERI | Reads the IO code. <br> Peripheral fault flag indication (for version 2.1 compatible <br> models only). |
| If a slave is using this option flag, there will be no error while <br> 0 is displayed. The display will change to 1 if an error occurs. |  |
| PARA | Displays and writes parameters. <br> Check that the address of the slave is other than 0 before <br> selecting this function. |
| When this function is selected, the default value (F) will be <br> displayed. Set the value (hexadecimal) with the UP or DOWN <br> keys and press the PRG key. The parameter will then be <br> sent to the slave once. By pressing the ADR key at this time, <br> the last parameter written can be checked. After the slave is <br> connected, the slave will operate according to the parameter <br> as long as this function is operating. Once the slave is <br> disconnected or another function is selected, the currently <br> set parameter will be lost. |  |
|  | Reads input data and writes output data. <br> Check that the address of the slave is other than 0 before <br> selecting this function. <br> the ADR key is released, communications with the slave will <br> stop. <br> the slave continuously while the PRG key is pressed. When <br> data will then be transferred once. The data will be output to <br> Dhe function transfers data while the ADR or PRG key is <br> pressed. With this function selected, input data will be read <br> once and displayed in hexadecimal. While the ADR key is <br> pressed, the data of the slave will be read continuously. <br> When the ADR key is released, communications with the <br> slave will stop. Set the value (hexadecimal) with the UP or |
| DATA |  |

## Arresters for signal line and control circuit, CN226 series

## Protects devices connected to power supplies from lightning damage

## Features

- Highly effective surge suppression using protection method combining gas discharge tube, varistor, and avalanche diode.
- Large surge discharge current
- Fast response to surges reduces influence on device.
- A comprehensive lineup to suit all kinds of signal line applications (e.g., transducers, remote terminals, and sensors).
- Simple mounting to IEC rail.
- The arrester mounts to the terminal block using a plug-in connection for simple inspection and replacement. Signal lines are not opened even if the arrester is removed.

|  | L-E | 400 V max. |  | 800V max. |
| Internal resistance |  | - | - | - |
| No. of ports |  | 1-port, combination type |  |  |
| Response time |  | $0.1 \mu \mathrm{~s}$ max. |  |  |
| Max.discharge current $8 / 20 \mu \mathrm{~s}$ | L-L | 2,000A |  | 5,000A |
|  | L-E | 2,000A |  | 5,000A |

Type number nomenclature

## CN226 - $\square$

A20: 4 to 20 mA
A50: 10 to 50 mA
TC: Thermocouple
PT: Resistance thermometer
PM: Potentiometer
SP: Slow pulse
24: Signal circuit 24V DC
48: Signal circuit 48V DC
24A: Control power supply circuit 24 V AC/DC
48A: Control power supply circuit 48V AC/DC
100A: Control power supply circuit 110V AC/DC

Basic type

Further
Information

Dimensions, mm

## Internal circuit diagrams

4-20mA, $10-50 \mathrm{~mA}$

## Thermocouple

Signal line 24V, 48V DC

## Resistance thermometer

## Control power supply

48V, 100V AC/DC

## Example of application effects

## Arresters for network circuits CN227 series

## Protects devices from all types of network surges

## Features

- Compatible with a variety of communications networks (10Base-5, 100Base-TX, 10Base-T, RS-485, PLC T-Link)
- Highly effective surge protection, optimal design

CN227-EBT

- Supports high-speed communications (100Mbs or faster), with extremely fast response to surges.
- Compact, lightweight design, with RJ-45 modular connectors greatly simplifying connection

## CN227-EB5

- Extremely low signal loss, and fast response

- Mounting tools and connection cables included for easy installation and replacement

CN227-RS42, RS44

- Slim 22.5 mm width, with a European style terminal box
- Supports 2-wire (RS42), and 4-wire (RS44) systems.
- Extremely low signal loss and high surge resistance (10kA $8 / 20 \mu \mathrm{~s}$ ) ensure a long service life.

## Specifications

| Type |  | CN227-EBT | CN227-EB5 | CN227-RS42 | CN227-RS44 |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Application |  | $\begin{array}{\|c\|} \hline \text { Ethernet } 10 \text { Base-T } \\ \text { 100Base-TX } \\ \hline \end{array}$ | Ethernet 10Base-5 | RS-485, PLC T-link |  |
|  |  | 2-wire |  | 4-wire |
| Rated voltage [Uc] |  |  | 52V DC | 3.5V DC | 60V DC |  |
| Transmission frequency band |  | DC to 100 MHz (100Mbps) | DC to 20MHz (20Mbps) | DC to 2 MHz |  |
| Clamping voltage | $\begin{aligned} & \mathrm{L}-\mathrm{L} \\ & \mathrm{~L}-\mathrm{E} \end{aligned}$ | $\begin{aligned} & 40 \mathrm{~V} \max . \\ & 150 \mathrm{~V} \text { max. } \end{aligned}$ | 40V max. 350 V max. | 25 V max. 400 V max. |  |
| Max. discharge current $8 / 20 \mu$ s |  | 500A | 10kA | 10kA |  |
| Ambient temperature and humidity Interface |  | -10 to $+60^{\circ} \mathrm{C}, 90 \%$ RH max. (No condensation) |  |  |  |
|  |  | Modular (RJ-45) | Coaxial tap Tranceiver connection | Screw terminal connection |  |

## Modified Products

## Command switches/ CCC approved AH, AR/DR and AM/DM series

## Change in the position of CCC approved indication

16 mm dia. AH164, AH165, AH165-2
22 mm dia. AR22/DR22, AM22/DM22
30 mm dia. AR30/DR30
$\frac{\text { Conventional }}{\text { Indication on the individual box }} \Rightarrow \frac{\text { New }}{\text { Indication on the switch body }}$

AH164, 165, 165-2 (Except pilot lights)

AR22, AR30, AM22
(Except ZB type with terminal cover conformed to IP2X)

DR22, DR30, DM22
Without transformer

- Time of modification: August 2004
- For safe operation, before using the product read the instruction manual or user manual that comes with the product carefully or consult the Fuji sales representative from which you purchased the product.
- Products introduced in this catalog have not been designed or manufactured for such applications in a system or equipment that will affect human bodies or lives.
- Customers, who want to use the products introduced in this catalog for special systems or devices such as for atomic-energy control, aerospace use, medical use, passenger vehicle, and traffic control, are requested to consult the Fuji sales division.
- Customers are requested to prepare safety measures when they apply the products introduced in this catalog to such systems or facilities that will affect human lives or cause severe damage to property if the products become faulty.
- For safe operation, wiring should be conducted only by qualified engineers who have sufficient technical knowledge about electrical work or wiring.

[^0]:    Further
    See D \& C Catalog 19th Edition, No. 06 (MCCBs) and 07 (ELCBs).

[^1]:    Note: * Short-circuit protection is not built-in.

[^2]:    Further
    Information
    See pages 05/48 and 05/55 of D \& C Catalog 19th Edition.

[^3]:    ${ }_{* 1}^{* 1}$ An input signal with a minimum duration of 150 ms is accepted normally. If the duration is less than 150 ms , the input will not always be accepted.
    *2 The pushbutton switch and the two-pin connector on the side of the unit are connected in parallel.
