Fuji Electric Co., Ltd

Fuji Electric Exhaust Gas Cleaning System (EGCS)

Turbidity sensor/ Chelsea water quality meter (Sea Sentry)

Dismantling (Notification)

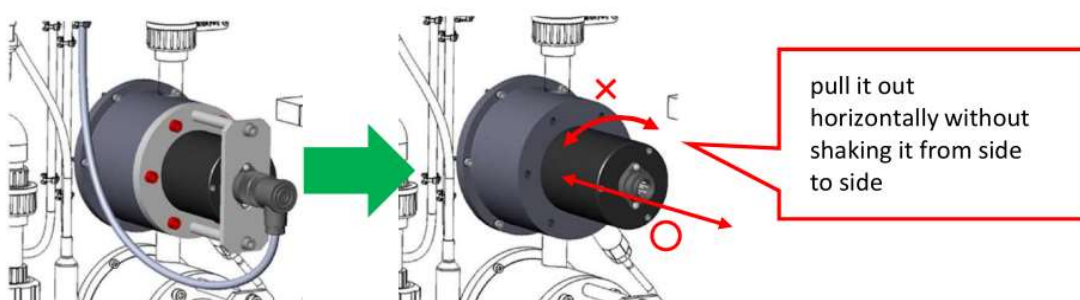

We would like to express our deepest appreciation to you for your continued support for our ship exhaust gas cleaning systems (EGCS).

The turbidity sensor mounted inside the water quality meter has a pin attached to the sensor body to fix the sensor position.

When removing the turbidity sensor for cleaning or replacement, shaking the sensor from side to side may damage the pins on the sensor body.

When dismantling the sensor, pull it out horizontally without shaking it from side to side.

(Please install in the same way when assembling)
