Fuji Electric Co., Ltd

## Fuji Electric Exhaust Gas Cleaning System (EGCS)

### EGCS IoT / Remote Monitoring System

We would like to express our deepest appreciation to you for your continued support for our ship exhaust gas cleaning systems (EGCS).

We are pleased to introduce the ship IoT system as an optional system of our scrubber

- Timely sharing of information between ship and shore reduces data collection tasks and improves work efficiency
- Primary guidance is automatically provided when trouble occurs to assist in early troubleshooting (under developing and will be ready on 2022)
- Predictive diagnostic functions detect failures before they occur

This system is able to install during new building and retrofitting.

Please consider this optional system for your safe and secure voyages in compliance with environmental regulations

For the quotation and queries, please kindly contact to our sales division.
