

# FUJI ELECTRIC Participated in InnoTrans2018 in Berlin

Thank you for visiting Fuji Electric at InnoTrans 2018.

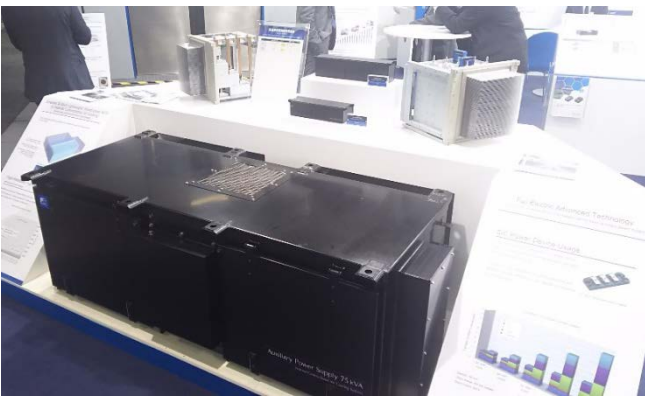

18-22 September 2018  
Messe Berlin, Germany

## Display Products

### Door System – Full-scale Mockup

Visitors had the opportunity to experience first-hand, the smooth operation and precise response of our door system.

### Auxiliary Power Supply

This is a natural convection air cooling APS\* with SiC devices. A smaller foot print is achieved by utilizing SiC devices. (\*currently under development.)

### Power Semiconductors

We displayed power semiconductors used in our railway equipment.

From the right,

- SiC Hybrid Modules
- All-SiC Modules
- HPnC (High-Current SiC Hybrid) Modules

### Miniature Models, Display Panels and Company Profile Info

We displayed a couple of miniature models of traction converters, comparing them with IGBT and SiC devices usage.

Substations, depot and station facilities were also displayed in the panels on the wall.

Throughout the show, our company profile video played on a wide-screen display in our booth.
