Dear Customers,

MICREX-SX Series
Notice of Change in Internal Circuit of DC Power Module (NP1S-42)

Thank you for using our Fuji programmable controller.

We hereby notify that we have changed the internal circuit of the DC power module (Type: NP1S-42) of the MICREX-SX Series in order to avoid any failure due to miswiring.

1. Details of Change
   (1) Items to be changed
       Internal circuit

   (2) Target
       DC power module of MICREX-SX series Type: NP1S-42

   (3) Details of Change
       By changing the internal circuit, we have improved the product so that a failure can be avoided even if the power supply has miswiring.
       (Please note that miswiring will mean the PLC does not operate.)

2. Notes upon Change
   (1) The change has been made for products manufactured from December 13, 2013.
   (2) With this change, the hardware version has been revised to 12 from 11.
   (3) There is no change in the external specifications, price, and standard that the product conforms to (CE/UL/ships).
