

- Fuji IGBT Module V Series 600V Family -

High current output characteristics

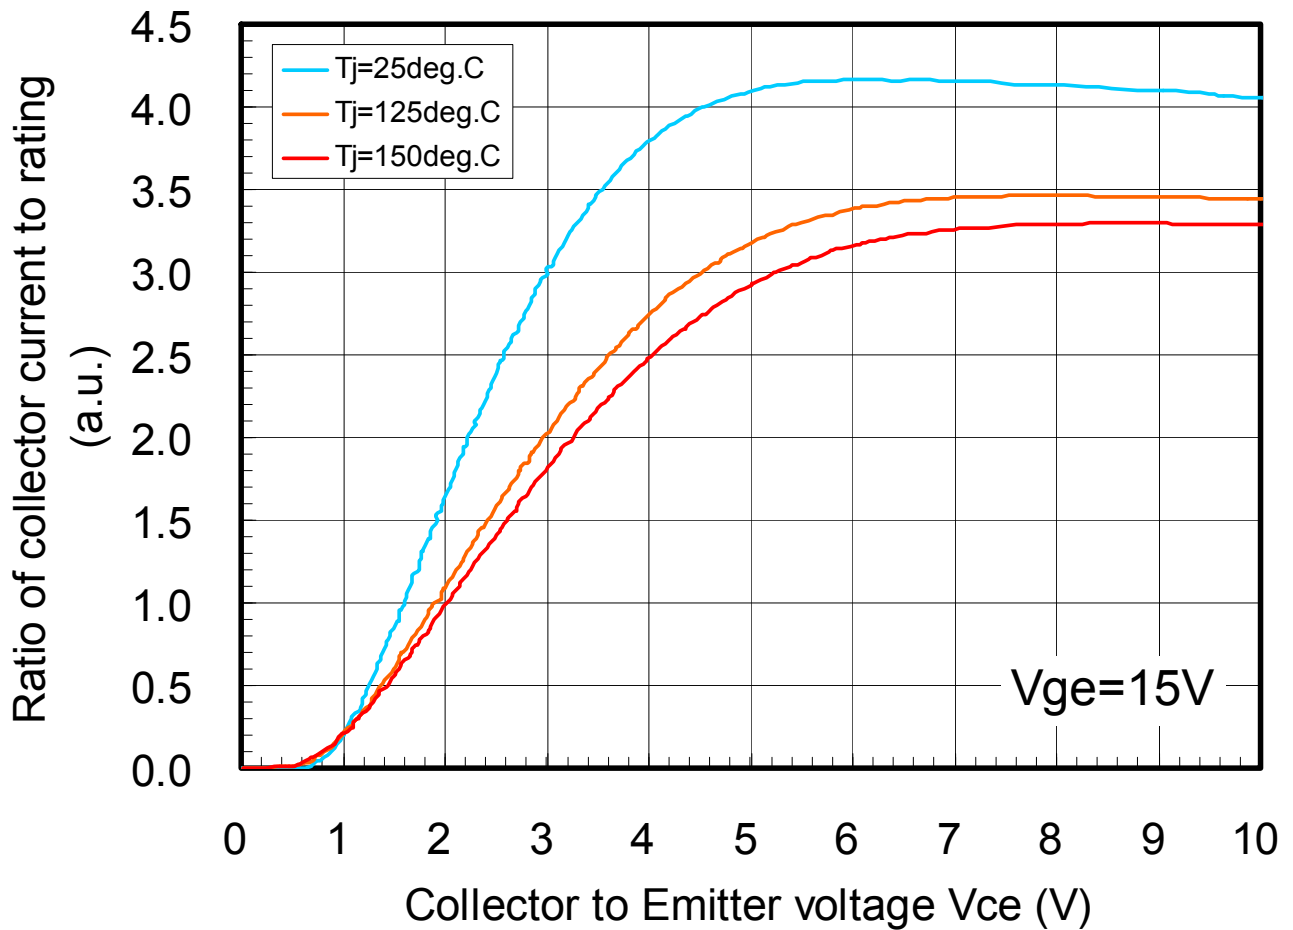

V series 600V product family

Conditions: $T_j=25^{\circ}\text{C}$, 125°C and 150°C

$V_{ge}=15\text{V}$

Note:

This data shows the typical waveforms of chip characteristics. The effect of the internal resistance of the module is not included

Technical data: MT5F24332
